THIS WEEK'S CREATION MOMENT

Against All Odds

*"In whom we have redemption through his blood, the forgiveness of sins, according to the riches of his grace."
- Ephesians 1:7*

Blood is one of the most miraculous of all creations. It carries oxygen and energy to our cells, and carries off wastes. It is also a communications

pipeline, using powerful hormones to provide communication between various parts of the body.

Hemoglobin is the substance within the blood that enables it to carry oxygen to your cells. Many different kinds of creatures, including lobsters and spiders, all have some type of blood with hemoglobin in it. Some creatures even have transparent blood. Hemoglobin, all by itself, testifies to a Creator. You see, so many different and obviously unrelated creatures have hemoglobin that evolutionists could only account for this by saying that hemoglobin must have evolved many times in many different creatures. This explanation worked when scientists thought that hemoglobin was a relatively simple molecule.

But now we know that hemoglobin is a very complex, eight-helix twisted molecule of about a hundred atoms, all arranged in just the right way around a central atom of iron. There is a zero chance of this complex molecule happening accidentally even once, much less the many times suggested by evolutionists.

Blood is a wonderful creation of God. He wants us to realize this so that we look for a relationship with Him, which is possible for us through the shed blood of His Son, Jesus Christ.
